

Study Guide for Scrum.org PSM-I and PSPO-I certifications

1. Read Scrum Guide: <https://www.scrumguides.org/scrum-guide.html>
2. Read Scrum.org -> Resources -> pick your certification, e.g. for PSM track: <https://www.scrum.org/index.php/pathway/scrum-master>
3. Practice tests on Scrum.org until you consistently hit 100%: <https://www.scrum.org/open-assessments>
4. Watch Agile at Spotify:
 - <https://labs.spotify.com/2014/03/27/spotify-engineering-culture-part-1/>
 - <https://labs.spotify.com/2014/09/20/spotify-engineering-culture-part-2/>
5. Watch Agile Product Ownership in a nutshell
 - <https://www.youtube.com/watch?v=502ILHjX9EE&>
6. Re-read Scrum Guide: <https://www.scrumguides.org/scrum-guide.html>
7. Do practice tests by Mikhail Lapshin: <http://mlapshin.com/index.php/scrum-quizzes/>
 - I highly recommend doing the real mode on this website when you think you are ready, and getting at least 90%-95% consistently before attempting the actual test
 - About half of the test is interpretation questions, and they are not available for practice, so you need to know theory 100% (hence practice tests) and internalize scrum and agile philosophy well (hence videos linked above) to achieve 85% passing score.
